SECTION 4 – STATEMENT OF REQUIREMENTS

Technical Specifications

The purpose of the Technical Specifications (TS), is to define the technical characteristics of the Goods required by the Procuring Entity. The Procuring Entity shall prepare the detailed TS taking into account that:

- *The TS constitute the benchmarks against which the Procuring Entity will verify the technical responsiveness of Bids and subsequently evaluate the Bids. Therefore, well-defined TS will facilitate preparation of responsive Bids by Bidders, as well as examination, evaluation of the Bids by the Procuring Entity.*
- *The TS shall require that all Goods be new, unused, and of the most recent or current models, and that they incorporate all recent improvements in design and materials, unless provided for otherwise in the contract.*
- *The TS shall make use of best practices. Samples of specifications from successful similar procurements in the same country or sector may provide a sound basis for drafting the TS.*
- *Standardizing technical specifications may be advantageous, depending on the complexity of the Goods and the repetitiveness of the type of procurement. Technical Specifications should be broad enough to avoid restrictions on workmanship, materials, and equipment commonly used in manufacturing similar kinds of Goods.*
- *Standards for equipment, materials, and workmanship specified in the BD shall not be restrictive. Recognized international standards should be specified as much as possible. Reference to brand names, catalogue numbers, or other details that limit any materials or items to a specific manufacturer should be avoided as far as possible. Where unavoidable, such item description should always be followed by the words “or substantially equivalent.” When other standards or codes of practice are referred to in the TS, whether from the Purchaser’s or from other eligible countries, a statement should follow other authoritative standards that ensure at least a substantially equal quality, then the standards mentioned in the TS will also be acceptable.*
- *Technical Specifications shall be fully descriptive of the requirements in respect of, but not limited to, the following:*
 - (a) *Standards of materials and workmanship required for the production and manufacturing of the Goods.*
 - (b) *Any sustainable procurement technical requirements shall be clearly specified.*
 - (c) *Detailed tests required (type and number).*
 - (d) *Other additional work required to achieve full delivery.*

- (f) *List of detailed functional guarantees covered by the Warranty and the specification of the liquidated damages to be applied if such guarantees are not met.*

[The TS shall specify all essential technical and performance characteristics and requirements, including guaranteed or acceptable maximum or minimum values, as appropriate. Whenever necessary, the Lead Procuring Entity / Procuring Entity / Responsible Contracting Entity shall include an additional ad-hoc Bid form (to be an Attachment to the Letter of Bid), where the Bidder shall provide detailed information on such technical performance characteristics in respect to the corresponding acceptable or guaranteed values.]
