2.1. Procedure

Title: Provision of Nuclear Safety I&C Consultancy, Design and Qualification Services

Description: This call for tenders concerns the provision of services in the field of instrumentation and control system engineering aiming to support F4E with the: • preparation of technical specifications; • follow-up of contracts and the acceptance of systems; • design of nuclear safety I&C systems. The overall scope can be divided into three main areas: 1) Direct support to F4E I&C procurement activities; 2) I&C consultancy services; 3) Procurement of tools or services (necessary to support activities 1 and 2).

Tender:

Tender identifier: Tender AMENTUM CLEAN ENERGY FRANCE SAS

Identifier of lot or group of lots: LOT-0001

Contract information:

Identifier of the contract: F4E-OMF-1116-01-03

Date of the conclusion of the contract: 18/12/2024

7. Modification

7.1. Modification

Identifier of the previous contract award notice: 403568-2021

Identifier of the modified contract: CON-0001

Reason for modification: Need for additional works, services or supplies by the original contractor.

Description: The contract modification is necessary due to updated requirements from ITER IO, particularly SDR #956, which introduces additional scope. A change of contractor is not feasible due to interconnectivity with the scope awarded in the initial specific contract (Art. 85f (4)(a) F4E FR). The services are already partially delivered and changing the contractor at this stage will result in duplication of work and delays. The current contractor, ranked first based on a balanced technical and financial evaluation, is likely to provide the most cost effective offer for this additional scope. Switching contractors would represent a significant inconvenience for F4E. The additional scope of work does not alter the subject matter of the contract. Its value is well below 50% of the original contract value.

7.1.1. Change

Description of modifications: Value of Specific Contract has been increased by 15.41%; All other conditions remain unchanged.
