SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1. SCOPE OF WORK

This document defines the scope of work to clean up of CAT III scrap metal in the “pink yard” at FOSKOR Phalaborwa in accordance with NNR RD-004 requirements and sections 2.5; 4.2 and 4.11 of the Safety Standards and Regulatory Practices (SSRP).

2. INTRODUCTION AND BACKGROUND

Once a mining and minerals processing plant is demolished, radioactivity contaminated metal components must be safely removed from site. Due to National Nuclear Regulator (NNR) policies, regulatory practices, and the increased safety culture, the process of decontaminating these components to acceptable levels remains challenging, but if done correctly, recycling for unrestricted industrial reuse is a viable option, thereby decreasing high-level radioactive waste volumes when onsite storage is limited or no longer feasible.

Following the demolition of a mining and minerals processing facility, a significant volume of metal components remains on site, many of which are contaminated with radioactive materials. In accordance with the National Nuclear Regulator (NNR) POLICIES AND South Africa’s stringent regulatory framework, the safe removal and disposition of these materials is a critical priority.

The decontamination of Category iii (CAT iii) scrap metal poses considerable technical and administrative challenges. However, when executed in compliance with NNR standard, these components can be recycled for unrestricted industrial reuse. This approach not only minimizes the volume of high-level radioactive waste but also alleviates pressure on limited or unavailable onsite storage facilities.

The disposition of CAT iii scrap metal is tightly regulated, each metal recycling facility must operate under NNR Authorization, adhere to defined waste acceptance criteria, and comply with rigorous administrative procedures. These controls ensure that public health, environmental safety, and regulatory integrity are maintained throughout the process.

3. PRE-QUALIFICATION

In terms of the National Nuclear Regulatory Act, No.47 of 1999 and subsequent Certificate of Registration 20, issued to FOSKOR Phalaborwa, it is recommended that a Radiation Protection Specialist (RPS) forms part of the scrap disposal and clean-up team. The RPS must be certified in terms of the Natural Scientific Professions Act, Act 27 of 2003, with his/her duties set out by the National Nuclear Regulator (NNR).

THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME**INTRODUCTION**

The National Industrial Participation Programme (NIPP), which is applicable to all government procurement contracts that have imported content, became effective on 1 September 1996. 1. PILLARS OF THE PROGRAMME

- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30% of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIPP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIPP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2. REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.
- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1.
